Welcome

Your new Vodafone Mobile Broadband USB Stick connects your computer to the internet over the Vodafone mobile phone network.

You can now browse the web, pick up emails, and use any other internet service wherever there's a mobile phone network, plus you can send, receive and manage SMS text messages directly on your computer.

Licenses

Your Vodafone Mobile Wi-Fi uses open source programs licensed under the GNU GPL (Version 2.0), BSD (Version 3.0), OpenSSL, Zlib/libpng, LGPL and Apache License.

You can download the source code free of charge from: <http://vodafone.com/k4607-z> for a period of three years from the distribution of this product.

Notice

Your Vodafone USB Stick is made exclusively for Vodafone by ZTE.

No part of this guide may be reproduced or transmitted in any form or by any means without prior written consent of ZTE.

Set up your USB Stick

Step 1

Slide the front cover off the USB Stick, and insert your SIM as shown.

Step 2

Plug the USB Stick firmly into your computer's USB port.

Set up your USB Stick

On Windows 8, you can open the charms by sliding your finger in from the right-hand border of your touchscreen, or by pressing the Windows and C keys.

Step 3

On Windows XP, Windows Vista and Windows 7

The installer for the Vodafone Mobile Broadband application should start automatically. If it does not, browse to your USB stick in Windows and double-click the setup program.

On Windows 8

Open the Settings charm, select Networks and then Mobile Broadband. After you have clicked Connect, the Vodafone Mobile Broadband application will be downloaded automatically.

On Apple Mac

Double-click the Vodafone Mobile Broadband app icon to install it and start it.

On Linux

Installation guidelines can be found at
<http://support.vodafone.com/QuickStart/Linux>

Linux – and all other systems

The screenshot shows the Vodafone Mobile Broadband QuickStart web interface. It features a navigation bar with 'Quick Start', 'SMS', and 'Account' tabs, and a 'Choose language' dropdown. Below this is a red header with the Vodafone logo, 'Settings', and 'Help' links. The main content area is titled 'Welcome to Vodafone QuickStart' and contains a welcome message and instructions on how to configure settings. A sidebar on the right displays 'Home network' status, including 'Mobile number', 'Signal', 'Status' (Connected), 'Network' (vodafone UK HSUPA), 'Time connected' (00:14:56), 'Total volume' (15.98MB), and 'Up/Down' speeds. The bottom of the page shows an 'Inbox' section with the message 'You have no current messages'. Four numbered callouts are present: 1 points to the 'Home network' status, 2 points to the 'Settings' link, 3 points to the 'Welcome to Vodafone QuickStart' section, and 4 points to the bottom of the page.

USB Stick LED lights

The LED light on your USB Stick shows which kind of mobile network has been found, and whether the USB Stick is connected to that network.

Red blinking

Searching for mobile network

Green blinking

A GPRS network has been found – you could connect

Green solid

Connected via GPRS

Blue blinking

A 3G network has been found – you could connect

Blue solid

Connected via 3G

Light blue solid

Connected via 3G Broadband.

Hints and tips

Install problems on Windows 7, Windows Vista or Windows XP

The following problems may be caused by an older release of the Vodafone Mobile Broadband application that was installed previously:

- No icon was created for the app on your desktop, or
- You double-click the desktop icon but the app doesn't seem to start, or
- When you plug in your Stick, no CD-ROM appears, or
- The app starts but then shows "Device Not Detected".

To make sure any older release is completely uninstalled:

- Download the Vodafone Mobile Broadband Cleanup app:
www.support.vodafone.com/vmb_cleanup.
- Use Windows as normal to uninstall the Vodafone Mobile Broadband app
- Double-click the zip archive to unpack Cleanup
- Run VmbCleanup.exe and select all three options:
Settings, Data and Device Registration
- Restart your computer
- Plug in your new USB Stick
- The correct app should then install automatically.

Hints and tips

If no network can be found

Change your physical location: in a building, move closer to a window, move higher up, or go outside.

On Windows 7, Windows Vista, Windows XP or Linux:

- Open the QuickStart application window
- Select the Settings heading on the Navigation bar
- Select the Network entry in the Menu bar on the left
- Click 'Search' to search for available networks
- Connect to one of the allowed networks
- Click 'Save' to save your change

On Apple Mac:

- Select the Connections tab
- Select Mobile Connections
- Click the magnifying glass 'Search' button
- Select one of the allowed networks.

If you are abroad, contact Support, and check that data services and roaming are enabled on your account.

Hints and tips

If no connection can be opened

- Check the status of your USB Stick in the Diagnostics window of your Vodafone Mobile Broadband app
- Wait a few minutes and try to connect again
- Close the application window and then re-open it
- Restart your computer
- Select an exclusive option in the connection or bearer settings, eg. '3G Only' instead of '3G Preferred'
- If you are using a VPN (Virtual Private Network), contact the administrator of your VPN
- Check that the type of account you have with your mobile network operator is selected in your app, eg. 'Prepaid'.

Support

As well as the Help documentation, your Vodafone Mobile Broadband app will include details of how to contact the Support team at your mobile network operator.

Glossary

Bearer Communication method used for data transport over the mobile network, eg. 3G Broadband, HSPA, 3G, etc.

Home network The network of the mobile operator who provided your SIM.

Roaming You can use your mobile device on any other mobile network that has a roaming agreement with your operator, whether in your country or abroad.

SIM Your Subscriber Identity Module is the small plastic chip that you will have received together with your mobile contract. Your SIM has gold contacts on one side.

EC DECLARATION OF CONFORMITY

It is hereby declared that following designated product:

Product Type: DC-HSPA+ USB Modem

Model No: K4607-Z

Product Description: DC-HSPA+ USB Modem

Complies with the essential protection requirements of Directives on Radio and Telecommunication Terminal Equipment (Directive 1999/5/EC), Restriction of the Certain Hazardous Substances in electrical and electronic equipment (Directive 2011/65/EU), Eco-design Requirements for Energy-Related Products (Directive 2009/125/EC) and their amendments. This declaration applies to all specimens manufactured identical to the samples submitted for testing/evaluation.

Assessment of compliance of the product with the requirements relating to Directive 1999/5/EC was performed by PHOENIX (Notified Body No.0700) and assessment of compliance of the product with the requirements relating to Directive 2011/65/EU and Directive 2009/125/EC was performed by ZTE Corporation Reliability Testing Centre. The assessments were based on the following regulations and standards:
